

SUPPLY2U

At Supply2U, we revolutionize agricultural supply chains with advanced Geographical Information Technology. Using GPS data to track farm locations, processing facilities, and transport routes, we ensure fresh, quality produce, optimize inventory management, and align products with market demands through a holistic, data-driven approach.

PROBLEM

In East Africa's dynamic agricultural landscape, supply chains face challenges in efficiency, transparency, and sustainability. Small-scale farmers and urban retailers deal with high post-harvest losses, inconsistent produce quality, and inflated prices due to many intermediaries.

OUR OBJECTIVES

-  Enhanced Agricultural Efficiency
-  Supply Chain Optimization
-  Transportation Management
-  Consumer Behavior Analysis

Our Team

- Dr. Lawrence Nderu - PI
- Ian Ndolo - Team Lead(Data Analyst)
- Neema Ogao -Web developer
- David Nzambuli - Backend developer
- Maureen Nyaga - Frontend developer
- Pharis Kariuki - Backend developer
